WORKSHOP ON EFFECTIVE MEDICAL THESIS WRITING

ABOUT THE COURSE

A thesis is an idea or theory that is expressed as a statement and is discussed in a logical way. The thesis should be a substantial, original contribution to the subject. Words are powerful and it makes effective statement. If it uses powerfully, get you appreciate otherwise disappoint. No one is born with good writing skills. It takes time to learn proper writing techniques and a great deal of practice to hone your skills. The expectation for best thesis writing has increased significantly in Junior / Senior Residents in various ayurveda colleges or universities. Most of clinicians do not aware about thesis writing skills in starting phase and expect to present good work in their presentation. Unfortunately, despite of standard writing and publishing research papers, most of ayurveda colleges and universities don't offer any formal training on writing effective thesis and research articles. The lack of guidance and resources has made it difficult. The aim of this course is to provide effective scientific writing skills to postgraduates and ayurveda professionals. This course is especially developed for professionals who need the essential knowledge to prepare them for writing and defending their thesis in an efficient and effective manner. We will start with the end in mind, "how is your thesis evaluated?" Based on this central question we will explain the formula of success and take you by the hand from topic selection all the way up to successful thesis defense. We will explain step-by-step procedures to handle certain phases of your research and provide many practical examples. After completing this course, you will have the essential knowledge to successfully complete your thesis work, because you know the necessary ingredients that make up a thesis.
